DEMO

COMPONENTS

USER EXPERIENCE

- Easy to navigate and locate information
- Layout and colors consistent throughout website

RESPONSIVENESS

- Mobile first
- Media breakpoints
- Use of Flex box
- Use of % or rem for attributes

NAVIGATION MENU

- Logo used to return to home page
- Hamburger menu
- Navigation menu display verticle for mobile

COMPONENTS

ACCESSIBILITY

- Not required to use mouse
- Tabable using tabindex
- Audit website using lighthouse for color

HTML SAMANTICS

- header
- nav
- section
- article
- p
- footer

CONTACT

- Professional links in footer and contact page
- Contact form in contact page

CONSTRAINTS AND IMPROVEMENTS

- Need more understanding on specificity rules as certain attributes are inherited and not behaving as I expected.
- Time to fix bugs (media screens, layout of elements and positioning)
- Once get the structure right I want to personalise it and put my flare on the site.

WHAT I ENJOYED

- It was rewarding seeing all that I have learnt come together to form my own website.
- Once I got the hang of Flexbox it saved me time with positioning of my components.

THANK YOU
